Company Overview

Primary Aimline is a federally recognized Service-Disabled Veteran-Owned Small Business (SDVOSB), that prides ourselves on our commitment to excellence and innovation. Our motto, "Cultivating Ideas," reflects our dedication to nurturing cutting-edge solutions that meet the evolving needs of our clients. Together, we aim to forge a safer future through collaboration and ingenuity while tackling the toughest problems of today.

Past Performance

Primary Aimline is currently completing the 2nd generation of the Sensor Strike System (S3), developing an EO/IR gimbal solution for loitering munitions. This program has resulted in price reductions from over \$26k per unit to under \$15k, with further cost reductions planned. We are also developing a similar system design for small Unmanned Surface Vehicles (USV's) that will be used in the DAWG program; this design environment is very demanding, and key technologies being implemented will be evaluated for incorporation into the Nod Plate design. Both programs have been sponsored by the Office of Research and Development – Office of Naval Research under the program management direction of Lee Mastroianni (lee.s.mastroianni.civ@us.navy.mil). The program is now delivering to 6 industry partners and will continue to ramp into production in late 2025 to early 2026.

Differentiators

- Native American, Service-Disabled Veteran-Owned Small Business
- Top Secret (TS) Facility Clearance and maintain 22 active Top Secret (TS) personnel clearances
- NIST SP 800-171 approval and will be CMMC Level 2 certified later this year
- Primary Aimline provides full-spectrum technology solutions to the DoD and Tier 1 primes in 5G and IT, UAVs, loitering munitions, counter-UAS systems, and low-cost sensor systems
- DCAA Approved Accounting System

Core Competencies

- Project Management Support – Our proven methodologies enable us to manage timelines, budgets, and deliverables with unmatched efficiency and accuracy.
- Power Platform Development – Our expert team of developers excel in creating intuitive, user-friendly applications that streamline operations and enhance productivity.
- Field Service Representatives – Our representatives are not just skilled technicians-- they are problems solvers with a deep understanding of real-world tactical conditions, ready to adapt and overcome any obstacle in their support of the warfighter.
- Micro Gimbal Manufacturing – Configurable to provide raw imagery from a diverse selection of EO/Vis and IR sensors, PMG provides a tailorable interface / on-board control module and an on-board IMU to provide high bandwidth image stabilization.

Certifications

SBA SDVOSB Certified

NIST 800-171 Compliant

NAICS Codes

541330 – Engineering Services

541512 – Computer Services Design

541611 – Administrative Management & General Management Consulting Services

541618 – Other Management Consulting Services

541715 – Research & Development in the Physical, Engineering, & Life Sciences (except Nanotechnology & Biotechnology)

541990 – All Other Professional, Scientific & Technical Services

336419 – Other Guided Missile & Space Vehicle Parts & Auxiliary Equipment Manufacturing

336414 – Guided Missile & Space Vehicle Manufacturing

334220 – Radio & Television Broadcasting & Wireless Communications Equipment Manufacturing

334511 – Search, Detection, Navigation, Guidance, Aeronautical, & Nautical System & Instrument Manufacturing
